I have a desire to learn, share, create, and solve problems. I like to be well rounded, and dabble in everything. Teaching and training are my passion, because the head cannot work without the body. I work well on a team, and I will be the first to admit when I'm wrong, and we can work together to solve anything we encounter. I am extremely passionate, and I am very driven to complete tasks and projects once they are started. Also, when in doubt...Google everything.
